

## THE MAGELLAN SERIES

THE MAGELLAN 110

Chief Designer Mark Fitzgerald has configured the MAGELLAN series as the culmination of the Paine office's long career designing some of the most luxurious and fuel efficient custom motor yachts ever built. Here is a yacht that offers its owner and crew total independence from shoreside requirements. The Magellan 110 hull and superstructure are designed for durability and strength using Alustar aluminium alloy, and her framing scheme utilizes bulbed stringers for the highest ratio of strength to weight possible with welded aluminium construction. Strict attention to weight savings combine with Fitzgerald's intimate knowledge of motoryacht hydrodynamics to yield a high ratio of speed to fuel consumption. Her scantlings comply with ABS rules and she can be classed for either personal or charter use.

The Magellan 110 offers the following features, which simply have never been combined elsewhere on a single yacht.

1. Truly self sufficient systems for go-anywhere independence.
2. Unique, roll resistant hull shape.
3. Unusually extensive boat deck.
4. Alfresco dining area at forward end of boat deck, aft of pilothouse.
5. Pilothouse offers full 360 degree views.
6. Portuguese bridge forward of pilothouse.
7. Owners' suite is forward with large windows, not stuffed down in hull.
8. Single level, stepless access between owners' suite and main salon.
9. Guest ensuites for between three and five couples per owner's requirements.
10. Sheltered side decks port and starboard.
11. Large aft cockpit with instant access to swimming/boarding platform.
12. Complete and extensive engineering and builder support far in excess of industry norms.

THE MAGELLAN 110 PILOTHOUSE IS UNUSUAL IN OFFERING 360 DEGREE VIEWS. AN ALFRESCO DINING AREA IS AFT.
