PISCES 21
AN INTERPRETATION OF THE HERRESHOFF "FISH"

DIMENSIONS

LOA:	20' 9"
LWL:	16' 3"
BEAM:	7' 2"
DRAFT:	2' 11"
DISPLACEMENT:	3,250 lbs
SAIL AREA:	265 sq. ft

Hull number one, Serendipity, beating to windward on a blustery fall day.

Computer renderings of the PISCES 21.

The *PISCES 21* is an adaptation of the famous Herreshoff *FISH* built by Classic Boat Shop in Bernard, Maine. We completed the design in the year 2000. There have been near replicas of the *FISH* before... this is but the latest interpretation of the classic Herreshoff design. Classic Boat Shop's *PISCES* is built in either cold moulded wood construction or fiberglass, and seventeen such yachts were built by 2008. These small yachts are finished to the very highest standard. They are among the finest daysailer/ weekenders on the coast of Maine or anywhere else.

Variations from the Herreshoff designed *FISH* were subtle and very carefully considered. When you start with perfection it's folly to change much. The keel was made slightly more cutaway forward. The ballast ingot was lengthened and its top surface lowered to lower the VCG. Many of the boats have been fitted with carbon fiber masts which markedly increases their stability.

Serendipity

Petunia- Chuck's labor of love which is being constantly restored.

When Chuck talks to Petunia, his beloved Herreshoff 12 ½ (built in 1937), he tells her he hopes she'll grow up to be a *Pisces 21* just like *Serendipity*.

*We designed a gaff rig for the *Pisces* in 2006. These have become a separate racing class at the Seawanbeka Corinthian Yacht Club.*
