DRAFT:	2.00 m	6' 7"
DISP:	16,375 kg	36,043 lbs
S.A.:	111.49 sq m	1,200 sq ft
BALLAST:	6,060 kg	13,338 lbs

The first Southernly 52 *ENTERPRISE* is an extrapolation of our highly successful Apogee 50. She was built in Sydney and Brisbane, Australia using sophisticated oneoff construction techniques. She came about when her Australian owner became aware of the American built Apogee 50, visiting Able Custom Yachts twice before coming to the unfortunate realization that protectionist trade policies in his home country would preclude his importing the yacht from America. *ENTERPRISE* was constructed of highest technology epoxy composites, beginning at McConaghy's in Sydney, Australia's highest quality yacht builder, and finishing off at a local yachtyard close to the owner's home in Brisbane.

The few differences between this design and the Apogee 50 will be evident in the drawings and photos. The Southernly 52 has broader, more powerful stern quarters, a slightly deeper draft keel, and consequently can support a taller sailplan. The cockpit shelter is positioned further aft, enabling side by side upholstered seats to be fitted on each side beneath the protective roof extension. The lighter epoxy construction method makes *ENTERPRISE* an even more brilliant performer than the very impressive Apogee 50.

While free trade seems to be sweeping the globe, there will be instances when the option of building locally will be the best course of action. In many cases we are able to modify an existing design to match the building methods prevalent at your local boatyard, and we would be most happy to do so.
