

## **125' MANDALAY**

**MANDALAY** was commissioned in 1991 and has now been sailed some 80,000 miles. Designed in collaboration with E.M. Brierley & Associates also of Camden, she is truly a magnificent yacht, the largest aluminum sailing yacht ever built in the United States at the time of her launching. Her 7,000 square foot sail plan is entirely roller-stowing and all winches are captive, making her sail handling far safer than the majority of large yachts.

THE YACHT'S OWNER ALSO OWNED THE NEW YORK METS BASEBALL TEAM, HENCE THE LOGO ON THE SPINNAKER.

This yacht was extraordinarily well finished by Palmer Johnson of Sturgeon Bay, Wisconsin. The schooner rig was chosen in order that she may be sailed beneath the Brooklyn Bridge as well as for its inherent stability and ease of handling in strong winds.

SHE'S A FINE LOOKING YACHT FROM ANY ANGLE.

LOOKING FORWARD IN THE MAIN SALON.

A HUGE YACHT BY ANY STANDARDS.

Extensive preliminary research by the combined Brierley & Paine offices yielded the unexpected critique by their captains that the single-stick mega yachts have a propensity to be tender, and spend much of their lives under power rather than sail. *MANDALAY* has exhibited none of these flaws, yielding 12-13 knot sailing speeds under complete control and at comfortably modest heel angles. She has been a frequent participant in the Nantucket Bucket and has even been known on occasion to win!

IT TAKES SHIP SIZE GEAR TO HANDLE HER HUGE ANCHORS.

ONE OF THE OWNERS' HEADS.

Mega-yachts represent the ultimate expression of an owner's commitment to yachting, and challenge the designer to assemble and motivate the most skilled professionals in the marine industry. Although *MANDALAY* is of a traditional character, we at Paine Yacht Design are by no means limited to this style of mega-yacht, and would be excited to undertake a yacht of more modern styling should this be your requirement.
